

## Finding Number Patterns In Word Problems Worksheet

Directions: Make tables to solve the problems. Remember all of the steps that you must follow. (Understand, Plan, Solve, Look Back)

1. Amanda planted flowers. There were 7 flowers in the first row, 13 in the second row, and 19 in the third row. How many are likely to be in the fifth row?
2. Kim hair was 5 inches long. After 6 months it was 11 inches long, after 12 months it was 17 inches long, and after 18 months it was 23 inches long. How long is Kim's hair likely to be after 2 years?

Month	Balance
0	\$12.00
1	\$15.50
2	\$19.00
3	\$22.50
4	\$26.00

**Use this table to answer the questions below:**

3. Damon opened up a savings account with \$12.50 and then made equal deposits each month. After a month, his balance was \$15.50, \$19.00 after 2 months, \$22.50 after 3 months, and \$26.00 after 4 months. What is Tyrone's balance likely to be after 5 months?

4. What is Tyrone's balance likely to be after 10 months?
