

Do you know how to be safe when using your computer!
Here are some golden rules to be safe. Match the beginnings and endings of the rules!

Don't take the back off your computer	such as your real name, your address or your school.
Turn off your computer	which makes you feel uncomfortable.
Don't give out any personal information	who you don't already know.
Never give your e-mail address	or stick your fingers or objects into the disk drive
Tell your parents if you find any information	before you plug a keyboard, monitor, mouse or printer into it.
Don't arrange to meet anyone	on the Internet is private.
Remember that nothing you write	to someone you don't already know.
Always delete unknown e-mail	because they may contain viruses.
Be careful before you put your e-mail address	on a mailing list – you could get junk mail.
Always check any files you download	attachments before opening them – they may contain viruses!

B. Computer Safe Vocabulary! Find the words!
